DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 26, 2007 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Casimir on September 6, 2007.

Claim 61 was rewritten as below to correct the claim dependency.

61. The method of claim 60, wherein said nucleotide analog is inosine, uridine, 2,6-diaminopurine, propyne C, or propyne T

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The amendment to the claims, which now require the use of a pair of primers which flanks a variable region and which now require the comparison of the base composition to those found in a database with five or more known base compositions, is responsive to the arguments made in the final rejection regarding the declaration. The identification of figure 27 as support for the number five in the database was considered and is found sufficient. There is no prior art which anticipates the claims. While there is a prima facie case of obviousness based upon the Jurinke, Norder and Koster references, this prima facie case is overcome by the evidence of the Buchsbaum declaration. As noted in related cases, the skepticism in the art evidenced by the Buchsbaum declaration is persuasive as a secondary consideration of non-obviousness. The skepticism of the JASON group in an internal review as noted in point 3 of the declaration that the project was not likely to be successful, persuasively argues that the claimed invention is unobvious based upon the secondary consideration of skepticism by experts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Fredman whose telephone number is (571)272-0742. The examiner can normally be reached on 6:30-3:00.
